

SBX-INSPOT
StationBox InSpot Indoor Hotspot Enclosure

Stock Level: **Sorry! Out of stock!**

\$22.00 + GST

Description

StationBox® InSpot is indoor enclosure designed for building of wireless hotspots. StationBox® InSpot directly supports MikroTik RouterBOARD RB912, RB711 and RB411, also accommodates integrated RB751s and RB951s. InSpot enables installation on the firm wall or on the ceiling tile. InSpot is designed to fit indoor environment. Grooves on the side of enclosure allow ventilation. InSpot also offers enough space for additional equipment, as USB drives, 3G modems, 3rd party antennas or power converters. We incorporated snap locks and twist locks wherever possible to make the installation and maintenance easy and smooth. By using 4dBi Omni you can achieve excellent results in large interiors as campuses, storages, entrance halls or shopping galleries, as well in offices, hotels or hospitals. It is easy to integrate 3rd party antennas to fit specific user requirements.

Features

Designed to Fit Any Interior
Easy Installation without Tools
