

RouterStation
 Ubiquiti RouterStation

Integrated PoE
 PoE (802.3af/at)
Ethernet Speed
 100Mbps

Stock Level: **Product in stock**

\$65.00 + GST

Description

Featuring a fast 680MHz MIPS 24K CPU, 64MB RAM, and 16MB Flash the Ubiquiti RouterStation provides excellent horsepower for a variety of processor intensive multi-radio system applications. Ubiquiti RouterStation ships with Open-WRT Kamikaze, the de facto standard for open-source wireless router software. The RouterStation is configurable by command line only with no GUI installed by default.

Features

- CPU Atheros AR7161 MIPS 24K running @ 680MHz
- MEMORY DDR 64MB
- FLASH SPI 16MB
- Three MINI-PCI Slots supports Type IIIA
- One USB 2.0 Host
- One UART
- ESD protection for carrier applications

Specifications

Details

Manufacturer's Code	RouterStation
Chipset	CPU Atheros AR7161 MIPS 24K running @ 680MHz
Interfaces	(3) 10/100 Ethernet Port
PoE In	Yes
Operating System	OpenWRT
