**Integrated PoE**  
 PoE (non standard) , PoE (802.3af/at)  
**Ethernet Speed**  
 100Mbps

Stock Level: **Product in stock**

**\$129.00 + GST**

### Description

The L-com BT-CAT5-P4 Quad port passive Power-over-Ethernet (PoE) Midspan/Injector from L-com provides a low cost solution for adding PoE capability to existing network switches. The unit is ideal for supplying power for up to four Network Appliances like Wireless Access Points and Bridges, Wired Switches and Cameras and IP Telephones with PoE capability. The unit will work with Network Appliances that use the spare Ethernet data pairs to receive power. The BT-CAT5-P4 features surge protection on the DC power feed and all lines are isolated from the chassis to minimize ground loops. The user can choose the appropriately sized power supply based on the equipment needs. The BT-CAT5-P4 can be used with power supplies up to 60 volts DC or AC. Go Wireless NZ Ltd offers a number of DC power supplies that can be used with the BT-CAT5-P4.

#### Features

- Low cost Quad port Midspan/Injector
- Provides DC power surge protection
- Industrial grade aluminium housing
- Great for use with Ubiquiti and MikroTik long range wireless access points

### Specifications

#### Details

Manufacturer's Product Code	BT-CAT5-P4
Connector Type 1	4x RJ45 Female
Connector Type 2	4x RJ45 Female
PoE Mode Support	Passive PoE
Voltage Rating	60V (AC/DC)
