

## ENH210EXT

LONG RANGE WIRELESS 11N OUTDOOR CB/AP

- IEEE802.11/b/g/n
- 2T+2R 300Mbps
- High Performance

**ENH210EXT** Wireless Outdoor Enterprise Access Point features 2 x N-type external connectors with high output power and high sensitivity can extend the transmission range to deliver a stable wireless connection. ENH210EXT integrates 4 operation modes: Access Point, Client Bridge, Client Router and WDS.

Use external connectors with high output power to combine flexible antenna, it's convenient to build long range wireless link while reducing dead spots. Advanced multi-function operation modes offer flexibility in constructing scalable wireless networks for all possible applications. ENH210EXT is designed to deliver reliable service under harsh outdoor environment with certified IP67 protection and tailored to accommodate multimedia streaming services with data-rate up to 300Mbps. Most importantly, it is built-in encryption standards (WEP, WPA, WPA2, TKIP/AES and IEEE802.1x) ensure maximum security and compatibility.

FEATURES				
SPECIFICATIONS				
High output power	Transmit high output power programmable for different country selections			
High Data Rate	High speed transmitting rate up to 300Mbps with 2T2R 802.11n			
Long range transmitting	Transmit power control and distance control (ACK timeout)			
Signal Strength Display	RF signal strength status is shown by LEDs of 3 colors, making network build-up easier.  LED indicators have the best transmit and receive signal for traffic communication			
Multiple SSID	8 SSID supported. Each SSID can set itself wireless or WAN access setting.			
NETWORKING				
PPPoE	Point-to-Point Protocol over Ethernet at Client Router mode. This function will keep trying when failed or disconnected
