

EASYBRACKET™

Universal Mounting Bracket

Product Datasheet

EasyBracket™ is versatile mounting bracket made of ABS plastic. EasyBracket™ is the right solution to most problems that occur when using steel mounting brackets. EasyBracket™ allows safe and fast installation of compact wireless CPEs, antennas, cameras and other devices on wall or pole.

Universal Mounting Bracket

EasyBracket is made of UV stabilized ABS plastic. EasyBracket is very light, which helps in decreasing overall load. Low weight and volume also significantly lower shipping costs. EasyBracket is suitable to be installed on insulated walls. Lowered weight and increased contact surface with wall decrease overall pressure EasyBracket makes against the wall surface. EasyBracket's body is made of resistant plastic and is corrosion free. This is ultimate solution to problems with ugly corrosion spots on walls or masts!

EasyBracket is delivered in two versions – EasyBracket Wall (mountable on wall only) and EasyBracket Universal (mountable on wall or mast). Using its Base, EasyBracket Universal can be turned in 16 equal steps /each 22.5°, so it can be mounted on non-vertical masts. Maximum mast diameter is 3 inches/75mm. Both versions come packed in plastic retail bags, folded into very compact shape. Maximum load is rated 10kg / 20lbs.

Technical Specification		Dimensions (LxWxH)	Weight
Plastic Bag	EB Universal	100 × 100 × 200 mm	270 g
	EB Wall		150 g
Carton 50pcs	EB Universal	590 × 390 × 350 mm	15 kg
	EB Wall		10 kg
