

AF-11FX-DUP-H

Ubiquiti airFiberX 11GHz High-Band Duplexer Accessory

Bands

10-11GHz

Connectors

N-Type , SMA

Stock Level: **Product in stock****\$349.00 + GST****Description**

The Ubiquiti AF-11FX features a unique modular duplexer design to suit multiple frequency configurations. Each AF-11FX radio can be configured to support any allowable frequency by simply changing the duplexers for high-band or low-band use in the 10.7 - 11.7 GHz allocation. Each duplexer has a low channel and a high channel that can be configured by simply reversing the position of the duplexer. The AF-11FX radio comes without any duplexers included. Duplexers are required for operation.

Features

This High-Band Duplexer supports 10.940 to 11.200GHz for Low Channel and 11.440 to 11.700GHz for High Channel operation

Alternative Low-Band Duplexer supports 10.700 to 10.955GHz for Low Channel and 11.200 to 11.445GHz for High Channel operation

Specifications**Details**

Manufacturer's Code	AF-11-DUP-H
Frequency Range	Low Channel: 10.940 to 11.200 GHz; High Channel: 11.440 to 11.700 GHz
Interfaces	(2) SMA Male; (1) N-Type Female
